Subject: Sustainable Urban Mobility Plans – Awareness Raising and Training Events

Dear Sir / Madam

The European Commission seeks to support local authorities in developing Sustainable Urban Mobility Plans in urban and peri-urban areas. In its Action Plan on Urban Mobility it committed to providing guidance materials, to promoting best practice exchange, to identifying benchmarks, and to supporting educational activities for urban mobility professionals.

To put this into effect, a team of country experts led by Rupprecht Consult under a contract managed by the EACI has devised a training programme for practitioners and decision makers across Europe on Sustainable Urban Mobility Plans. We would like to encourage you to assist this team of experts with the organisation and delivery of this programme in your area.

If you have any queries regarding the event programme please contact our Bulgarian contact point Prof Lucia Ilieva at Club 'Sustainable Development of Civil Society' (mail@csdes.org) who is in charge of organising an awareness raising workshop and a technical seminar in Bulgaria.

Thank you for your assistance.

Yours sincerely

Vincent Berrutto
